Letter of recommendation

To whom it may concern:

I am a Professor in Medical Systems Engineering at Chiba University (Chiba-city, Japan). I'm also served as a president of Japanese Society of Medical electronics and Biological Engineering.

It is a great pleasure for me to recommend Mr. Chua Wang An to your undergraduate program. Ngee Ann Polytechnic strongly recommends studying abroad during 6 months internship training program. . Mr. Chua is one of the students involved this program. I entitled " Development of wearable sensor" He has been hardly studied and investigated the project I am accordingly well acquainted with his ability, character and qualifications.

Mr Chua 's work was about the development of wearable motion sensor. He designed and produced not only the electrical circuit but software systems. His work was exceptional, and I awarded him the highest mark for internship record of Ngee Ann Polytechnic.

The project in the development of wearable sensor is rather difficult research project for Polytechnic student. Mr. Chua, however, cleared the hurdle satisfactorily and joined the project. He was always enthusiastic about discussing various subjects at my laboratory, and he attended frequent study meetings on our undergraduate student. He took on the leadership role in holding and attending laboratory meeting.

He hopes to study continuously in your undergraduate Engineering program. I am confident that he is qualified to successfully complete his studies at your University, which is one of the prestigious universities in the Singapore If he is allowed to study and acquire necessary information on Engineering at your school, I believe he will be able to work even more actively than now and make a debut on the Engineering scene. Furthermore the scholarship helps him to harder research and development.

Toshiyo Tamura, Ph.D.
Professor

I wholeheartedly recommend Mr. Chua for your favorable consideration.

Sincerely

Professor Toshiyo Tamura
